Subject: Village of Lexington Shoreline – Lexington, Michigan
Shoreline Protection System: Preliminary Engineering Proposal

Dear Ms. Tatman,

Thank you for contacting us and for the opportunity to work with the Village to develop a strategy for the ongoing erosion along the shoreline of the North Shore development, which consists of approximately 1,100 LF of Lake Michigan shoreline. We are pleased to present this proposal for engineering services to review and facilitate improvements to your property. We understand that the Village would like to assess the current shoreline and determine prudent shoreline protection structure system strategies. This occurrence is more common as of lately due to current Lake Michigan water levels. Edgewater Resources, LLC is uniquely qualified to assist you with the project.

FIRM OVERVIEW

Our team of engineers, surveyors, architects, planners, and landscape architects specialize in the planning and design of waterfront projects. We have extensive experience throughout the Great Lakes that includes

marine/civil engineering, landscape architecture, and the associated regulatory/permitting processes. Our projects range from residential docks to marinas containing over 1,000 slips. We understand that no two sites are alike, and that every site presents unique physical opportunities and constraints that must be addressed. We're currently working with many individual lakefront property owners, as well as lakefront condominium associations who, like you, are feeling the effects of rising water levels and the coastal processes of Lake Michigan. After over a decade of low water conditions, the Lake Michigan water level has returned to long-term averages and may trend even higher, exposing aging and/or insufficient shore protection systems.

In addition, we recently completed the St. Joseph Coastal Engineering Study here in St. Joseph, Michigan. The study evaluated the Lake Michigan coast within the City limits to provide recommendations for shoreline management to best preserve the public trust property along the shoreline and protect/enhance private interests. The report has been published by the FEMA Great Lakes Coastal Flood Study Discovery Report and by NOAA as a case study for coastal management here:

<http://greatlakesresilience.org/case-studies/land-use-zoning/engaging-communities-promote-coastal-zoning>

SCOPE

We propose to complete the following scope of work:

Task I – Site Visit

This task includes a site visit to the property from a registered professional engineer to document the current condition of the shoreline to assess the shoreline. Information gathered during this visit will be used to develop a strategy to address the active erosion along the shoreline. The strategy will be described in a memo format. The memo will outline recommendations to address the shoreline erosion, permitting implications, and potential costs of the recommendations. As part of this task, Edgewater will also contact EGLE to determine the implications of the newly adopted High Risk Erosion designation for this area of the shoreline.

Deliverables

- Erosion Strategy Memo

EXCLUSIONS

This proposal fee does not include any outside costs for permit fees due to state and federal agencies, obtaining records, etc. This proposal does not include modification of the existing EGLE and USACE permits. The following are special studies and tasks are excluded from this proposal:

Managers' Report for January 2020

Master plan – our consultants are working hard to pull all the information together and update the edits our Steering committee recommended after our last meeting. CIP is being worked on and integrated into the process. Zoning is wrapping up some final edits after a meeting this week.

Miscellaneous tasks - committee meeting questions & follow-up, work orders, HR issues, approvals, resident complaints and issues, legal questions and issues

Personnel Practices/Policies Manual – attorney's office is finalizing

Village Office Building Maintenance – letter was completed by the Village and vetted by our attorney – it has been presented to the Township and we are still waiting on their response.

DNR/Harbor Initiatives – the Village should be receiving documents from the DNR of their proposed upgrades and renovations to the boat access site and harbor area this week. The harbor committee has been at the table through this process sharing suggestions, concerns and positives regarding their plans.

DDA – the group met with a consultant from our Masterplan firm to hear details on the necessary info to redo their DDA plan. They will need to work on this in the next year to get into compliance.

USDA – we are still waiting on USDA offer letters. The process is much longer than we anticipated and with new USDA employees handling the accounts there is an extra layer of thoroughness happening on the front end of the application as opposed to the back end which is what we were anticipating.

Tree Removal – tree removal is underway however some trees have temporarily been removed off the list due to their locations and the ground being too soft. This request has come on behalf of the Village and once things freeze again; we will get Paterson back to finish the work.

Basement rehab - is complete. The Village Clerk has done an exceptional job of organizing, purging, and cleaning the basement storage areas. The Village and Township shared storage room is where our "forever" documents will be housed and the new storage room is where all departments can store their files that have destroy dates. This will allow us to keep better track of where things are and a better retention schedule for all departments.

Port Sanilac Water Negotiations – the Village and Port Sanilac are still in communication about a potential deal to supply them water. A decision should be made in the very near future.

Staff evaluations – staff evaluations are being wrapped up for 2019. Unfortunately, the end of the year got too busy and these were overlooked. The intent is annual evaluations turned in by the end of the calendar year.

Mobile Home Park – after a discussion with Greg Weykamp from Edgewater I found he has a coastal engineer on staff. He has submitted a quote for his engineer to do a full site assessment of the MHP bluff to determine status and solutions for bluff stabilization. This comes at the request of council after they determined at a previous council meeting, they didn't think the vegetation, netting and staking proposals by the local contractors were enough of a long-term solution.

Short Term Rentals – all short-term rental applications currently submitted for the STR designation are on holding pending the legal dispute. Once that situation is resolved the planning commission can begin the conditional land use process on the remaining applications.

Blue meets Green Initiative – this is an initiative that stems from St. Clair County and after some communication with one of the SC County Commissioners I have gotten their board to agree to bring Lexington into the mix and start including us. I will be attending my first meeting with the group next week to learn more about it. The basis for the initiative is to drive economic development and tourism to the blue water area – we are often still considered part of the blue water area from our southern neighbors and we believe we can all benefit from incorporating Lexington into that.

Clerk Report

January 2020

Office

All boxes from Pod and DPW are in the basement. DPW did a great job on the shelving. Making great strides in organizing the basement.

Small storeroom is housing the permanent files. Everything is on shelves and I have been able to organize 85 percent of the files. Large storeroom has all the files that can be destroyed, maps, police files and some fire department files. All boxes are on the shelves, about 25 percent are organized. Big thank you to Holly for her help and the DPW.

Holly and I cleaned out the storage room off the council chambers. Thanks to DPW for their help.

Purging files in my office. Gabby Wurmlinger helped us over the holidays and did quite of shredding and helping me files in the basement.

Cemetery Board will not meet again until spring.

Parks and Recreation cancelled meeting this month, no quorum. Ice Rink at Lester Street Park is on hold for now, due to the weather.

MHP Manager Report

1/27/2020

Holly and I have been discussing the bluff erosion and working to gather all the information needed for this project to continue forward. We want to make sure that the project gets in the hands of the right firms for review, and there are still a few unanswered questions. Holly has made contact with Edgewater to see what it might take to bring them on board. Pictures have been sent for review and to see what all is going to be involved in this project. EGLE has been involved in this process as well, we are expecting to use as many resources as we can to resolve this issue in the best possible way. Holly will be presenting to Council a proposal for Edgewater to come in and do an assessment of the property.

Paterson is working on the trees here in the park. They began with the trees that needed to be trimmed and now are working on the ones that are easy to access since the ground has not had time to freeze enough to bring equipment back and forth without causing too many issues. The crew has been fantastic about checking into the office daily. It has allowed me to know where they are heading for the day and make phone calls when needed.

The hot water heater needed work I have called a few plumbers to get estimates for fixing or replacing it. DPW could not work on the type of hot water heater that is in the installed currently. After speaking to three different companies and getting bids it was suggested by all three to replace the hot water heater. The three companies had submitted bids, but fortunately the DPW can replace the heater for us.

Just a reminder I will be spending a majority of my time in the Park working on matters involving the Park, but will likely work 8 hours a week in the Village offices. I will also need to cover for vacations or other times when fellow employees are off. I spent a fair amount of the Christmas break covering for people that has time off.

I announced the marketing plan to the residents of the park called "Your Story". I am very excited by this project and hope that I will be able to get residents on board with sharing why Lexington North Shores is so special. After researching several marketing ideas, I felt that this plan was the best fit for the overall atmosphere that I am trying to create here at LNS. We have such a lovely community to share with others. What better way to show the world how wonderful our park is, but by sharing our heartfelt stories about why everyone loves living here.

Most importantly, Holly and I have worked on the Rules and Regulations necessary to help make the rules clear and enforceable. The previous set of rules left too much gray area and need some tightening. The intent is to help management and residents alike in navigating through the rules and regulations to make our Park even better than has been.
